EDUCATION

CETYS Universidad

Expected July 2027

Bachelor of Science in Software Engineering

GPA 9.1/10

Relevant Courses: Object Oriented Programming, Algorithm Analysis, Software Modeling, UI/UX design, Database Design, Operating Systems Fundamentals, Web development

WORK EXPERIENCE

LKMX

July 2025 - present

Software Engineer

- Developed **features and screens** for two of **Mexico's largest telecommunications mobile apps** (150,000+ monthly users each) using **React Native with Expo** and **TypeScript**, as part of an agile team with comprehensive unit testing.
- Reduced application crashes by 20%** by optimizing existing codebase architecture and implementing efficient state management patterns, directly **improving user experience and application stability**.
- Built micro frontend modules with **Next.js** and **integrated AI agents using Google ADK** for a marketing platform, **covering metrics, audience generation, analytics extraction, and AI-powered asset creation**, within a microservice architecture using **React and TypeScript**.

Concretos Industrializados Valdés S.A. de C.V.

February 2025 - June 2025

Freelance Software Developer

- Delivered a complete lead generation web solution, **increasing qualified leads by 20%**, by **working directly with stakeholders** to identify and optimize business requirements.
- Executed full **UI/UX design process** from user research to final implementation, creating wireframes and developing a **mobile-first responsive design** that **streamlined the lead capture workflow and improved user engagement**.

MAJOR PROJECTS

Smart Bussing

April 2025

Cross-Platform mobile App prototype that allows users to better make use of public transportation

- 1st Place** out of **12 teams** at **CETYS 2025 Engineering fair**.
- Allowed users to **visualize local public transportation routes** obtained through city-provided documentation.
- Integrated user comments and route feedback to increase **community engagement**.
- Developed using a stack consisting of **React Native, Tailwind, Spring Boot** and **PostgreSQL**.

FeastFlick

September 2024

Web Application that offers a local alternative to online food ordering services focusing on community vendors

- Built a **RESTful API** with **Spring Boot** to manage user authentication, restaurant listings, orders, and payments.
- Designed and implemented the frontend interface using **React** and **Tailwind CSS**, prioritizing **responsive design** and **accessibility**.

Auction MVC Web App

March 2024

Web Application that allows users to browse and post listings

- Implemented a **RESTful API** using **ASP.NET** with **C#** which allows users to create and browse listings, post comments, and place bids, storing data with **SQL Server Express**.

SKILLS

PROGRAMMING LANGUAGES

PROFICIENT: C/C++, Java, C#, TypeScript, Javascript, Python
BEGINNER: Swift

TECHNOLOGIES

FRAMEWORKS: React, React Native, Next, Expo, Vue, Tailwind, SpringBoot, Nest, Express
DATABASES: PostgreSQL, MySQL, SQL server express, Datagrip, Supabase
INFRASTRUCTURE: Git, Github, Gitlab, Docker, Makefile
AGENTS: Claude Code, Codex

AWARDS

1st Place at CETYS 2024 Engineering Fair Pre-Alpha: Designed a mobile app for Sustainable development.
1st Place at CETYS 2025 Engineering Fair Alpha: Designed a mobile app for the use of public transportation.
1st Place at CETYS 2026 Engineering Fair Beta: Developed features and worked through the redesign of our public transport app.
